Portfolio / GitHub

PROFESSIONAL SUMMARY & OBJECTIVE

Third-year Digital Technology student at Suranaree University of Technology with experience developing web and mobile applications and working with relational databases. Familiar with JavaScript, React, Node.js, and AI-assisted development tools. Seeking a Software Development Internship to apply technical knowledge, strengthen problem-solving skills, and contribute to real-world software projects.

EDUCATION

Suranaree University of Technology
2024 - Present

Bachelor of Science in Digital Technology — Institute of Digital Arts and Science

- **Core Programming & Software Engineering:** Object-Oriented Programming, Scripting Language Programming, Cross-Platform Application Development with Scripting Language, Software Engineering, Software Testing, Virtual Community
- **Data & Analytics:** Database Design and Development, Advanced Database Design, Database Administration, Business Intelligence, Information Visualization
- **Security & Infrastructure:** Foundation in Information and Network Security, Cryptographic Protocols

Phraibung Wittayakom School
2018 - 2023

High School Diploma (Science-Mathematics Program)

TECHNICAL EXPERTISE

Languages & Core:	JavaScript (ES6+), Java, SQL, HTML5, CSS3
Frontend & Mobile:	React.js, React Native (Expo), Responsive Web Design
Backend & Databases:	Node.js, Express.js, Firebase, MySQL, SQLite, RESTful APIs
Developer Tools:	Git, GitHub, VS Code, DB Browser for SQLite

CORE SOFT SKILLS (2025–2026)

Problem-Solving & Analytical:	Systematically analyze and resolve complex system architecture and application logic challenges.
Adaptability & Continuous Learning:	Quickly master new frameworks, developer tools, and data workflows for continuous self-improvement.
Cross-Functional Collaboration:	Effectively communicate with team members, coordinate task delegation, and achieve project milestones on schedule.

ACADEMIC & SOFTWARE PROJECTS

1. AEC VERSE (Smart Biogas Digital Twin Platform)

Interactive Web & 3D Simulation `JavaScript` `HTML5` `CSS3`

- Architected a 26-page web application featuring 5 distinct interactive modal popups for specialized safety training.
- Developed an automated safety assessment quiz module with instant scoring logic and electronic certificate (E-Certificate) generation.

2. MissionLife (Gamified Habit Tracker Mobile App)

Cross-Platform Mobile Application `React Native` `Expo` `Firebase`

- Developed a cross-platform mobile app leveraging gamification to convert daily habits into quests with EXP rewards.
- Integrated Firebase Realtime Database & Authentication to manage real-time user state, progression, and leveling mechanics.

3. retail-insight (Retail Analytics Dashboard)

Data Visualization Web Application `React.js` `Vite` `Recharts`

- Built an interactive retail analytics dashboard visualizing sales summaries, consumer behavior, and product rankings via Recharts.

4. Student Gaming & Academic Performance Analytics

Business Intelligence & Data Analytics Canvas `Power BI` `Data Mining` `BI Canvas`

- Analyzed survey data from 243 students using Analytics Canvas methodology to evaluate correlation between gaming habits and GPAX.
- Designed an interactive BI dashboard analyzing risk rates (42.4%), gaming duration, subject-wise GPAX, and living environment insights.

5. StockMB (Desktop Inventory Management System)

Desktop Application `Java` `MySQL` `SQLite`

- Engineered a desktop inventory management solution supporting real-time CRUD operations, stock status tracking, and database synchronization.
